EXAMINER'S AMENDMENT

1) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Duke Taylor on January 5, 2006.

The application has been amended as follows: Claim 10 has been rejoined with the application and allowed.

2) The following is an examiner's statement of reasons for allowance: None of the references cited either alone or in combination provide at least one first friction element formed of a first friction material; at least one discrete second friction element formed of a second friction material; the first friction element spaced from the discrete second friction element forming a gap between adjacent first and second friction elements to prohibit the friction elements from contacting each other to promote air flow around the friction elements; the first friction element and the second friction element having desired configurations enabling multi-positioning and interchangeability irrespective of their orientation for positioning of the first and second friction elements at several different positions on the backing member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
